SALGA	South African Local Government Association

## **City of uMhlathuze**

Annual Financial Statements for the year ended 30 June 2018

### **Accounting Officer's Responsibilities and Approval**

The City of uMhlathuze, situated at 5 Mark Strasse, Richards Bay, is a category B municipality, established in terms of section 12(1) of the Municipal Structures Act, 1998 (Act No. 117 of 1998) and published in terms of the Provincial Government Notice 346 on 19 September 2000. The Local Government operations of the Municipality are assigned by section 156 and 229 of the Constitution of the Republic of South Africa, 1996 (Act No 108 of 1996) and are defined specifically in terms of section 83 of the Municipal Structures Act.

The annual financial statements set out on pages 4 to 65, which have been prepared on the going concern basis by the accounting officer in terms of section 126 (1) of the Municipal Finance Management Act, 2003 ( Act No 56 of 2003 ) and were signed off on 31 August 2018.

I certify that the salaries, allowances and benefits of Councillors, loans made to Councillors, if any, and payments made to Councillors for loss of office, if any, as disclosed in note 27 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act, 1998 (Act No 20 of 1998) and the Minister of Provincial and Local Government's determination in accordance with this Act.

As required by Section 45 of the Municipal Systems Act and Section 121(4)(a) and (b) of the Municipal Finance Management Act, the Annual Financial Statements were submitted to the Auditor-General South Africa (AGSA) on 31 August 2018.

---

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These annual financial statements have been prepared in accordance with Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board (ASB) in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003) with the exception of certain accounting policies adopted in accordance with International Accounting Standards (IAS).

The principal accounting policies adopted in the preparation of these annual financial statements are set out below:

- GRAP 1 Presentation of Financial Statement
- GRAP 2 Cash Flow Statements
- GRAP 3 Accounting Policies, Changes in Accounting Estimates and Error
- GRAP 5 Borrowing Costs
- GRAP 6 Consolidated and Separate Financial Statements
- GRAP 9 Revenue from Exchange Transactions
- GRAP 12 Inventories
- GRAP 13 Leases
- GRAP 14 Events after the Reporting Date
- GRAP 16 Investment property
- GRAP 17 Property, Plant and Equipment
- GRAP 19 Provisions, Contingent Liabilities and Contingent Asset
- GRAP 21 Impairment of non-cash generating asset
- GRAP 23 Revenue from Non-exchange transactions
- GRAP 24 Presentation of budget information
- GRAP 25 Employee benefits
- GRAP 26 Impairment of cash generating assets
- GRAP 31 Intangible Assets
- GRAP 100 Non-Current Assets Held for Sale and Discontinued Operations
- GRAP 103 Heritage Assets
- GRAP 104 Financial Instruments
- GRAP 106 Transfer of Functions between entities not under common Control

The following GRAP standards have been issued but are not yet effective and have not been adopted early by the municipality:

- GRAP 18 Segment Reporting
- GRAP 20 Related Party Disclosures
- GRAP 32 Standard of GRAP on Service Concession Arrangements: Grantor
- GRAP 108 Statutory Receivables
- GRAP 109 Accounting by Principals and Agents

The following GRAP standards have been issued and effective but are not applicable to the municipality.

- GRAP 4 The effects of changes in foreign exchange rates
- GRAP 6 Consolidated and separate financial statements
- GRAP 7 Investments in associate
- GRAP 8 Interest in joint ventures
- GRAP 10 Financial reporting in hyperinflationary economics
- GRAP 27 Agriculture

#### 1.1 Presentation currency

These annual financial statements are presented in South African Rand. The figures are rounded off to the nearest rand.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

### 1.3 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

### 1.4 Significant judgements and sources of estimation uncertainty

The preparation of the Municipality's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

#### Judgements

In the process of applying the Municipality's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements.

#### Operating lease – Municipality as lessor

The Municipality has entered into commercial property leases on its investment property portfolio. The Municipality has determined, based on an evaluation of the terms and conditions of the arrangements, that it retains all the significant risks and rewards of ownership of these properties and accounts for the contracts as operating leases.

#### Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are as follows:

#### Depreciation and impairment

The Municipality depreciates its assets over their estimated useful lives taking into account residual values, where appropriate. The appropriateness of its assets' estimated useful lives, residual values and their depreciation methods are re-assessed on an annual basis. The actual lives of these assets and their respective residual values may vary depending on a variety of factors. In re-assessing asset lives, factors such as technological innovation, product life cycles and maintenance programmes are taken into account.

Management used their judgement in applying the internal and external impairment indicators to its assets. No impairment indicators were identified and as such the recoverable amounts of the aforementioned assets was not calculated.

#### Customer receivables

At year-end management makes an estimate of the amount of total outstanding customer debt that it expects to hand over to external debt collectors and the total subsequent receipts it expects to receive after year end. In addition, management estimates the amounts that it expects to recover from outstanding balances handed over based upon the age profile of debts handed over and based on prior experience and trends. A provision for impairment is raised based on these estimates. A detailed breakdown of the student fee receivable is provided in note 3.

### 1.5 Comparative figures

#### Prior year Comparative

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.5 Comparative figures (continued)

When the presentation or classification of items in the Annual Financial Statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

#### Current year Comparative

Budgeted amounts have been included in the annual financial statements for the current financial year only.

### 1.6 Property, plant and equipment

#### Initially recognition

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year.

Infrastructure assets in particular are those that are part of a system or network, specialized in nature and do not have alternative uses, immovable and maybe subject to constraints on disposal.

The cost of an item of property, plant and equipment is recognised as an asset if, and only if it is probable that future economic benefits or service potential associated with the item will flow to the municipality, and if the cost or fair value of the item can be measured reliably.

Property, plant and equipment are initially recognised at cost on its acquisition date or in the case of assets acquired by grant or donation, deemed cost, being the fair value of the asset on initial recognition. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality.

Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

The cost of an item of property, plant and equipment acquired in exchange for a non-monetary asset is measured at its fair value. If the acquired item could not be measured at its fair value, its cost was measured at the carrying amount of the asset given up.

#### Subsequent measurement

Subsequent expenditure relating to property, plant and equipment is capitalised if it is probable that future economic benefits or potential service delivery associated with the subsequent expenditure will flow to the entity and the cost or fair value of the subsequent expenditure can be reliably measured.

Subsequent expenditure incurred on an asset is only capitalised when it increases the capacity or future economic benefits associated with the asset. Where the municipality replaces parts of an asset, it de-recognises the part of the asset being replaced and capitalises the new component.

Subsequently all property plant and equipment, are measured at cost (or deemed cost), less accumulated depreciation and accumulated impairment losses. Compensation from third parties for items of property, plant and equipment that were impaired, lost or given up is included in surplus or deficit when the compensation becomes receivable.

#### Depreciation

Land is not depreciated as it is regarded as having an indefinite life. Depreciation on assets other than land is calculated on cost, using the straight-line method, to allocate their cost to their residual values over the estimated useful lives of the assets. The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality on each asset.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.6 Property, plant and equipment (continued)

Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The depreciation rates are based on the following estimated useful lives.

The municipality assesses at each reporting date whether there is any indication that the entity's expectations about the residual value and useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value. The change(s) are accounted for in accordance with the Standard of GRAP on Accounting Policies, Changes in Accounting Estimates and Errors.

Depreciation only commences when the asset is available for use.

#### Transitional provision

The municipality changed its accounting policy for property, plant and equipment in 2017. The change in accounting policy is made in accordance with its transitional provision as per Directive 3 of the GRAP Reporting Framework.

In accordance with the transitional provision as per Directive 3 of the GRAP Reporting Framework, where property, plant and equipment was acquired through a transfer of functions, the municipality is not required to measure that property, plant and equipment for a period of two years from the effective date of the transfer of functions or the effective date of the Standard, whichever is later. The municipality acquired a transfer(s) of function in 2018 and property, plant and equipment has accordingly been recognised at provisional amounts, as disclosed in 9.

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. The depreciation method applied to an asset is reviewed at least at each reporting date and, if there has been a significant change in the expected pattern of consumption of the future economic benefits or service potential embodied in the asset, the method is changed to reflect the changed pattern. Such a change is accounted for as a change in an accounting estimate.

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the financial statements (see note 9).

The municipality discloses relevant information relating to assets that are work in progress, in the notes to the financial statements (see note 9).

The table below shows the depreciation methods and average useful lives.

### Derecognition

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

### 1.7 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### Operating leases - lessor

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease.

Leased assets are classified as investment property measured at cost model and depreciation on leased assets has been calculated in accordance with GRAP 17 Property, plant and equipment.

#### Operating leases - lessee

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease expenses are recognised on a straight-line basis over the lease term.

### 1.8 Impairment of cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.8 Impairment of cash-generating assets (continued)

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

In assessing whether there is any indication that an asset may be impaired, the following have been considered:

External sources of information

- Cessation or near cessation, of the demand or need for services provided by the asset;
- Significant long-term changes with an adverse effect on the entity that have taken place during the period or will take place in the near future, in the technological, legal or government policy environment in which the municipality operates.

Internal sources of information

- Evidence of physical damage of an asset;
- Increased expenditure on repairs and maintenance on the asset.

Assets that are subject to depreciation or amortisation are reviewed for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the carrying amount exceeds the recoverable amount. The recoverable amount is the higher of the assets Fair Value less cost to sell, or its value in use.

### 1.9 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

In assessing whether there is any indication that an asset may be impaired, the following have been considered:

External sources of information

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.9 Impairment of non-cash-generating assets (continued)

- Cessation or near cessation, of the demand or need for services provided by the asset;
- Significant long-term changes with an adverse effect on the entity that have taken place during the period or will take place in the near future, in the technological, legal or government policy environment in which the municipality operates.

Internal sources of information

- Evidence of physical damage of an asset;
- Increased expenditure on repairs and maintenance on the asset.

Assets that are subject to depreciation or amortisation are reviewed for impairment whenever events or circumstances indicate that the serviceable amount may not be recoverable.

An impairment loss is recognised for the amount by which the carrying amount exceeds the recoverable service amount.

The recoverable service amount is the higher of the assets fair value less cost to sell, or its value in use.

The value in use is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

### 1.10 Intangible assets

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 10).

An asset is identified as an intangible asset when it:

- is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, assets or liability, or
- arises from contractual rights or other legal rights, regardless whether those rights are transferable or separate from the Municipality or from other rights and obligations.

#### Initial recognition

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software, licenses and development costs.

The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or the service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the Municipality intends to complete the intangible asset for use or sale
- it is technically feasible to complete the intangible asset
- the Municipality has the resources to complete the project, and
- it is probable that the Municipality will receive future economic benefits or service potential

Acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. Internally generated intangible assets are subject to strict recognition criteria before they are capitalised.

Intangible assets are initially recognised at cost. Where an intangible asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

#### Amortisation and impairment

The cost of an intangible asset is amortised over the useful life of 3 years.

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at each reporting date and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance.

#### Subsequent measurement

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.10 Intangible assets (continued)

Intangible assets are carried at its cost less any accumulated amortisation and any accumulated impairment losses.

#### Derecognition

An intangible asset is derecognised when it is permanently withdrawn from use and no future economic benefit or service potential is derived from it. The gain or loss arising from the disposal of an intangible asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the asset. It is recognised in surplus or deficit when the intangible asset is derecognised.

### 1.11 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

Property interests held under operating leases are classified and accounted for as investment property in the following circumstances:

When classification is difficult, the criteria used to distinguish investment property from owner-occupied property and from property held for sale in the ordinary course of operations, including the nature or type of properties classified as held for strategic purposes, are as follows:

The nature OR type of properties classified as held for strategic purposes are as follows:

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the annual financial statements (see note 8).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the annual financial statements (see note 8).

#### Initial recognition

Investment property is recognised as an asset, only where:

- It is probable that the future economic benefits or service potential that are associated with the investment property will flow to the entity; and
- The cost or fair value of the investment property can be measured reliably.

Investment properties have been initially measured at cost (Transaction costs shall be included in this initial measurement). Transaction costs are costs which are directly attributable to the expenditure, for example professional fees for legal services, conveyancing fees, property transfer taxes and other transaction costs shall be included in this initial measurement.

If payment for investment property is deferred, its cost is the cash price equivalent.

The difference between this amount and the total payments is recognised as interest expense over the period of credit.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.11 Investment property (continued)

#### Subsequent measures

Subsequently investment properties are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is calculated on cost, using the straight-line method over the useful life of the property. Vacant land held under investment properties is not depreciated.

#### Derecognition

An investment property is derecognised upon disposal, or when it is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal. Any gain or loss arising from the retirement or disposal of investment property is included in surplus or deficit in the period of the retirement or disposal.

### 1.12 Inventories

Consumable stores, unsold water, and land held for sale are valued at the lower of cost and net realisable value.

In general, the basis of determining cost is the first-in, first-out method.

For the land component recognised in terms of GRAP 12 land is recognised at cost with the cost based on fair value at date of recognition.

Redundant and slow-moving inventories are identified and written down to current replacement cost.

### 1.13 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Revenue from exchange transactions refers to revenue that accrued to the Municipality directly in return for services rendered/goods sold, the value of which approximates the consideration received or receivable.

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and are recognised as revenue in the period of consumption. Where meters cannot be read during a particular month, they are provisionally billed with the necessary adjustments made in the month in which they were read. Revenue from the sale of electricity prepaid meter cards is deferred and recognised as revenue on the consumption basis, commencing on date of purchase.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied.

Service charges from sewerage are based on the water consumption on each developed property using the tariffs approved from Council and are levied monthly.

Interest and rentals are recognised on a time apportionment basis. Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant gazetted tariffs. This includes the issuing of licences and permits.

Income for agency services is recognised on a monthly basis once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

Revenue from the sale of goods is recognised when the risks and rewards of ownership of the goods is passed to the consumer.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.13 Revenue from exchange transactions (continued)

Revenue from exchange transactions is measured at the fair value of the consideration received or receivable taking into account the amount of any trade discounts allowed by the Municipality,

### 1.14 Revenue from non-exchange transactions

Revenue from non-exchange transactions refers to transactions where the Municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis.

Fines constitute both spot fines and summonses. Revenue from spot fines and summonses is recognised when it is accrued. Spot fines are usually not given directly to the offender. Further legal processes have to be undertaken before the spot fine is enforceable. In respect to summon, the Public Prosecutor can decide whether to waive the fine, reduce it or prosecute for non-payment by the offender.

Donations are recognised on a cash receipt basis or where the donation is in the form of property, plant and equipment, when such items of property, plant and equipment are brought into use furthermore Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the Municipality.

Where public contributions have been received but the Municipality has not met the related conditions, a deferred income (liability) is recognised.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No. 56 of 2003) and is recognised when the recovery thereof from the responsible Councillors or officials is virtually certain.

The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

### 1.15 Provisions and contingencies

Provisions are recognised when the Municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at reporting sheet date and adjusted to reflect the current best estimate. Contingent Liabilities and Assets are not recognized but disclosed.

The Municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is probable.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

### 1.16 Housing development fund

Housing selling schemes both complete and in progress at 1 April 1998, were also transferred to the Housing Development Fund. All proceeds from housing developments, which include rental income and sales of houses, is paid into the Housing Development Fund. Monies standing to the credit of the Housing Development Fund are used to finance housing developments within the municipal area. Any transfers to and from the fund are recognized in the statement of changes in net assets.

### 1.17 Retirement benefits

The Municipality provides post-retirement medical aid benefits to retired employees. The entitlement to these benefits is usually conditional on the employee remaining in employment up to retirement age.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.17 Retirement benefits (continued)

An actuarial valuation involves making various assumptions. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions.

The Expected costs of these benefits are accrued over the period of employment. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized immediately in the statement of financial performance for the reporting period. The Defined benefit obligations are valued once in two years by independent qualified actuaries.

### 1.18 Borrowing costs

Borrowing costs incurred are recognised as an expense in the Statement of Financial Performance in accordance with the revised GRAP 5.

### 1.19 Financial instruments

#### Classification

The Municipality has types of financial instruments and these can be broadly categorised as either Financial Assets or Financial Liabilities.

#### Subsequent measurement of financial assets and financial liabilities

Financial assets are categorised according to their nature as financial assets at amortised costs and financial liabilities are categorized as financial liabilities carried at amortised cost in accordance with GRAP 104.

#### Financial assets

The classification of financial assets depends on their nature and purpose, and is determined at the time of initial recognition.

#### Trade and other receivables

Trade and other receivables are categorised as financial assets: loans and receivables including statutory receivables and are initially recognised at fair value and subsequently carried at amortised cost. Amortised cost refers to the initial carrying amount, plus interest, less repayments and impairments. An estimate is made for doubtful receivables based on a review of all outstanding amounts at year end. The fair value of Debtors is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date.

Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. Impairments are determined by discounting expected future cash flows to their present value. Amounts that are receivable within 12 months from the reporting date are classified as current.

An impairment of trade receivables is accounted for by reducing the carrying amount of trade receivables through the use of an allowance account, and the amount of the loss is recognised in the Statement of Financial Performance within operating expenses. When a trade receivable is uncollectible, it is written off.

Subsequent recoveries of amounts previously written off are credited against operating expenses in the Statement of Financial Performance.

#### Cash and cash equivalents

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value.

For the purposes of the Cash Flow Statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The Municipality categorises cash and cash equivalents as Financial assets: loans and receivables. The closing balance on the bank account is representative of its fair value of the monies held

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdrafts are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as Financial liabilities: other financial liabilities carried at amortised cost.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.19 Financial instruments (continued)

#### Financial liabilities

##### Trade and other payables from exchange transactions

Financial liabilities consist of trade payables and borrowings. They are categorised as financial liabilities held at amortised cost, are initially recognised at fair value and subsequently measured at amortised cost which is the initial carrying amount, less repayments, plus interest. The fair value of Creditors is estimated as the present value of future cash flows, discounted at the market rate of interest at the reporting date.

##### Borrowings and other financial liabilities

Borrowings are recognised initially at fair value, net transaction costs incurred. Borrowings are subsequently stated at amortised cost. Long-term borrowings are non-derivative financial loans and the Municipality does not hold financial loans for trading purposes. Long-term borrowings are utilised. Other financial liabilities are carried at amortised cost.

The interbank rate or prime lending rate is not the risk-free interest rate, however it has been used as a benchmark for determining the market related rate of interest which is not significantly different to the current rates on long-term loans, hence the fair value of these loans equates their amortised cost.

### 1.20 Heritage assets

A heritage asset is defined as an asset that has a cultural, environmental, historical, natural, scientific, technological or artistic significance and is held and preserved indefinitely for the benefit of present and future generations.

The municipality separately discloses expenditure to repair and maintain heritage assets in the notes to the financial statements (see note 11).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 11).

#### Initial measurement

A heritage asset that qualifies for recognition as an asset shall be measured at its cost (Cash price equivalent at the recognition date). Where a heritage asset is acquired through a non-exchange transaction, its cost is deemed to be its fair value as at the date of acquisition.

#### Subsequent measurement

Heritage assets are not depreciated, since their long economic life and high residual value mean that any depreciation would be immaterial.

After recognition as an asset, heritage assets shall be carried at its cost less any accumulated impairment losses. The Municipality assesses at each reporting date whether there are any indicators of impairment of Heritage assets.

Where there is an indication of impairment the assets are recorded at their recoverable amount or their recoverable service amount.

#### Derecognition

A Heritage asset is de-recognised when it is disposed or where there is no future economic benefits or service potential are expected from its use or disposal. The gain or loss arising from de-recognition, is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognized.

### 1.21 Short term benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.21 Short term benefits (continued)

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The expected cost of bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

### 1.22 Grants in aid

The Municipality donates money, goods or services to individuals, organisations and other sectors of government from time to time. When making these donations, the Municipality does not:

Receive any goods or services directly in return as would be expected in a purchase or sale transaction;

Expect to be repaid in future; or

Expect a financial return, as would be expected from an investment.

These transfers are recognized in the statement of financial performance as expenses in the period during which events giving rise to the transfer occurred.

### 1.23 Budget information

The budget is prepared on an accrual basis. The budget amounts are scheduled as a separate additional financial statement called the statement of comparison of budget and actual amounts.

Explanatory comments are provided in the notes to the annual financial statements, first stating reasons for changes from approved to final budget and secondly reasons for overspending or underspending on line items.

### 1.24 Unauthorised expenditure

Unauthorized expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003).

### 1.25 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure.

Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### 1.26 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### 1.27 Value-added Tax

#### VAT

The Municipality accounts for Value Added Tax on payments basis. This means that VAT is declared to the South African Revenue Services as input VAT or output VAT only when payments are made to suppliers or payments are received for goods or services. The net output VAT on debtors where money has not been received or creditors where payment has not been made is disclosed separately in the Statement of Financial Position in terms of GRAP 1.

### 1.28 Transfer of functions between entities not under common control

#### Definitions

An acquiree is the entity and/or the functions that the acquirer obtains control of in a transfer of functions.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.28 Transfer of functions between entities not under common control (continued)

An acquirer is the entity that obtains control of the acquiree or transferor.

Acquisition date is the date on which the acquirer obtains control of the acquiree.

Contingent consideration is usually, an obligation of the acquirer to transfer additional assets or a residual interest to the former owners of an acquiree as part of the exchange for control of the acquiree if specified future events occur or conditions are met. However, contingent consideration also may give the acquirer the right to the return of previously transferred consideration if specified conditions are met.

Control is the power to govern the financial and operating policies of another entity so as to obtain benefit from its activities.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

A function is an integrated set of activities that is capable of being conducted and managed for purposes of achieving an entity's objectives, either by providing economic benefits or service potential.

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from the entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, asset or liability; or
- arises from contractual rights (including rights arising from binding arrangements) or other legal rights (excluding rights granted by statute), regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.

A merger is the establishment of a new combined entity in which none of the former entities obtain control over any other and no acquirer can be identified.

Non-controlling interest is the interest in the net assets of a controlled entity not attributable, directly or indirectly, to a controlling entity.

Owners (for the purposes of this Standard), is used broadly to include holders of residual interests.

A residual interest is any contract that manifests an interest in the assets of an entity after deducting all of its liabilities. A residual interest includes contributions from owners, which may be shown as:

- equity instruments or similar forms of unitised capital;
- a formal designation of a transfer of resources (or a class of such transfers) by the parties to the transaction as forming part of an entity's net assets, either before the contribution occurs or at the time of the contribution; or
- a formal agreement, in relation to the contribution, establishing or increasing an existing financial interest in the net assets of an entity.

A transfer of functions is the reorganisation and/or the re-allocation of functions between entities by transferring functions between entities or into another entity.

#### The acquisition method

The municipality accounts for each transfer of functions between entities not under common control by applying the acquisition method.

Applying the acquisition method requires:

- (a) identifying the acquirer;
- (b) determining the acquisition date;
- (c) recognising and measuring the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree; and
- (d) recognising the difference between (c) and the consideration transferred to the seller.

#### Identifying the acquirer

For each transfer of functions between entities not under common control, one of the combining entities is identified as the acquirer.

The terms and conditions of a transfer of functions undertaken between entities not under common control are set out in a binding arrangement.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.28 Transfer of functions between entities not under common control (continued)

Determining the acquirer includes a consideration of, amongst other things, which of the combining entities initiated the transaction or event, the relative size of the combining entities, as well as whether the assets or revenue of one of the entities involved in the transaction or event significantly exceed those of the other entities. If no acquirer can be identified, the transaction or event is accounted for in terms of the Standard of GRAP on Mergers.

#### Determining the acquisition date

The acquirer identifies the acquisition date, which is the date on which it obtains control of the acquiree.

All relevant facts and circumstances are considered in identifying the transfer date.

#### Recognising and measuring the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree

##### Recognition principle

As of the acquisition date, the municipality as acquirer recognises, the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree.

Recognition conditions:

To qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Framework for the Preparation and Presentation of Financial Statements and the recognition criteria in the applicable Standards of GRAP at the acquisition date.

In addition, to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must be part of what the municipality as acquirer and the acquiree (or its former owners) agreed in the binding arrangement rather than the result of separate transactions.

Operating leases:

The municipality as acquirer recognises no assets or liabilities related to an operating lease in which the acquiree is the lessee.

The municipality as acquirer determines whether the terms of each operating lease in which the acquiree is the lessee are favourable or unfavourable. The municipality as acquirer recognises an intangible asset if the terms of an operating lease are favourable relative to market terms and a liability if the terms are unfavourable relative to market terms.

An identifiable intangible asset may be associated with an operating lease, which may be evidenced by market participants' willingness to pay a price for the lease even if it is at market terms.

Intangible assets:

The municipality as acquirer separately recognises the identifiable intangible assets acquired in a transfer of functions. An intangible asset is identifiable if it meets either the separability criterion or the contractual-legal right criterion.

Classifying or designating identifiable assets acquired and liabilities assumed in a transfer of functions:

At the acquisition date, the municipality as acquirer classifies or designates the identifiable assets acquired and liabilities assumed as necessary to apply other Standards of GRAP subsequent to the acquisition date. The municipality as acquirer makes those classifications or designations on the basis of the terms of the binding arrangement, economic conditions, its operating or accounting policies and other relevant conditions as they exist at the acquisition date.

##### Measurement principle

The municipality as acquirer measures the identifiable assets acquired and the liabilities assumed at their acquisition-date fair values.

The municipality as acquirer does not recognise a separate valuation allowance as of the acquisition date for assets acquired in a transfer of functions that are measured at their acquisition-date fair values because the effects of uncertainty about future cash flows are included in the fair value measure.

# City of uMhlathuze

Annual Financial Statements for the year ended 30 June 2018

## Accounting Policies

### 1.28 Transfer of functions between entities not under common control (continued)

In measuring the acquisition-date fair value of an asset such as a building or a patent that is subject to an operating lease in which the acquiree is the lessor, the municipality as acquirer takes into account the terms of the lease.

#### Exceptions to the recognition principles

Contingent liabilities:

The requirements in the Standard of GRAP on Provisions, Contingent assets and Contingent liabilities do not apply in determining which contingent liabilities to recognise as of the acquisition date. Instead, the municipality as acquirer recognises as of the acquisition date a contingent liability assumed in a transfer of functions if it is a present obligation that arises from past events and its fair value can be measured reliably.

#### Exceptions to both the recognition and measurement principles

Employee benefits:

The municipality as acquirer recognises and measures a liability (or asset, if any) related to the acquiree's employee benefit arrangements in accordance with the Standard of GRAP on Employee Benefits.

#### Measurement period

If the initial accounting for a transfer of functions is incomplete by the end of the reporting period in which the transfer occurs, the municipality as acquirer reports in its financial statements provisional amounts for the items for which the accounting is incomplete. During the measurement period, the municipality as acquirer retrospectively adjust the provisional amounts recognised at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and, if known, would have affected the measurement of the amounts recognised as of that date.

During the measurement period, the municipality as acquirer also recognises additional assets or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date and, if known, would have resulted in the recognition of those assets and liabilities as of that date. The measurement period ends as soon as the municipality as acquirer receives the information it was seeking about facts and circumstances that existed as of the acquisition date or learns that more information is not obtainable. However, the measurement period does not exceed two years from the acquisition date.

### 1.29 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

### 17. Employee benefit obligations (continued)

#### Key assumptions used

The Municipality operates on 5 accredited medical aid schemes, namely: Bonitas, Hosmed, Keyhealth, LA Health and Samwumed. Pensioners continue on the option they belonged to on the day of their retirement. The independent valuers, ZAQ Consultants and Actuaries, carried out a statutory valuation for the year ended 30 June 2018 with projected liabilities for year ending 2019 and 2020. There are no planned assets. Assumptions used at the reporting date:

Discount rates used	Yield curve	9.78 %
Expected increase in salaries	Yield curve	5.78 %
Expected pension increases	Yield curve	3.79 %
Proportion of employees opting for early retirement		80.00 %
Expected increase in healthcare costs	CPI + 1	8.20 %
Future changes in maximum state healthcare benefits		90.00 %

### 18. Housing development fund

The Housing development fund is represented by the following assets:

Opening Balance	3 061 960	2 749 778
Bank and Cash	3 061 960	3 061 960
Accumulated Surplus	(3 061 960)	(2 749 778)
	<b>3 061 960</b>	<b>3 061 960</b>

### 19. Accumulated surplus

#### Ring-fenced internal funds and reserves within accumulated surplus - 2018

	Capital replacement reserve	Accumulated surplus	Total
Opening balance	311 297 656	4 711 748 919	5 023 046 575
Transfer to Accumulated Surplus	(120 973 400)	120 973 400	-
Surplus for the year	-	289 621 193	289 621 193
	<b>190 324 256</b>	<b>5 122 343 512</b>	<b>5 312 667 768</b>

### 20. Service charges

Sale of electricity	1 281 889 919	1 506 657 693
Sale of water	373 831 155	336 492 585
Sewerage and sanitation charges	70 033 876	81 746 919
Refuse removal	97 765 031	73 580 195
	<b>1 823 519 981</b>	<b>1 998 477 392</b>

An amount of R10 595 197.12 (2017: R10 418 194.54) received in respect of prepaid electricity sales has been deferred and transferred to amounts received in advance.

#### 23. Property rates (continued)

Pensioners - R15 000 Valuation Reduction on primary developed property

In addition to the statutory R15 000 reduction in the valuation on residential properties, a further reduction of R105 000 of the valuation on all developed residential properties with >R40 000 was made.

Rates are levied on a monthly basis but upon request can be levied annually. The final date for payment of rates that are levied on an annual basis is 30 September of each year, and 30 June for monthly ratepayers. Interest of prime plus 1% is levied on outstanding rates.

This committed expenditure relates to property and will be financed by available bank facilities, government grants, funds internally generated, etc.

### 39. Contingencies

Guy Morton Shaw Smith N.O. and 2 others referred to as Indlovu Development Trust ( Mzingazi Golf Estate developers) launched an application against council for an amount of R1 142 748.90 in respect of bulk services contribution. They claim that Council unlawfully appropriated this amount from the proceeds of the sale while council was only supposed to levy R 121 355.45. They seek an order for payment of the sum of R 1 142 748.90, interest at the rate of 9% per annum from the date of demand costs of suit and further and / or alternative relief. The matter was defended and is ongoing. The court date has not been set.

Council procured services from Kulu Civils in respect of Tenders 8/2/1/UMH22-15/16 and 8/2/1/UMH23-15/16. The contractor subsequently did not comply with the conditions in the letter of intention to award. The intention to award was subsequently cancelled. Kulu Civils has referred the matter to the Adjudicator who found in favour of the contractor that they were entitled to general costs, loss of profit. The decision of the Adjudicator has been challenged and a review application has been lodged in the High Court. The possible outflow of economic benefits is R500 000. The matter is ongoing.

### 40. Related parties

There were no related party transactions that occurred during the year.

### 41. Prior-year adjustments

During the year the municipality reversed depreciation on assets that were fully depreciated but still in use. There was also revenue receivable from land sales that was not recognised. Presented below are those items contained in the statement of financial position that have been affected by prior-year adjustments:

#### Statement of Financial Position

#### 2017

	Note	As previously reported	Correction of error	Restated
Property, plant and equipment	9	5 230 608 852	58 258 738	5 288 867 590
Intangibles	10	31 410 939	2 313 314	33 724 253
Investment Property	8	124 379 462	(374 471)	124 004 991
Receivables from non-exchange transactions	4	122 181 038	4 300 000	126 481 038
Accumulated surplus	19	4 958 861 861	64 497 581	5 023 359 442
Housing Development Fund	18	2 749 778	312 182	3 061 960
		<b>10 470 191 930</b>	<b>129 307 344</b>	<b>10 599 499 274</b>

#### Reclassifications

Reclassification of repairs and maintenance.

The Municipality reclassified repairs and maintenance as previously disclosed in the statement of financial performance to ensure that expenses included in this activity are allocated to the respective nature of expenditure. There is no overall effect on surplus. The impact of this reclassification is as follows:

#### Description

Amount disclosed as repairs and maintenance	171 286 435
Reclassified to contracted services	(96 446 796)
Reclassified to materials and supplies	(74 839 639)
	<b>-</b>

#### Reclassification of Service charges

The municipality reclassified service charges to exclude the surcharge on water as it does not meet the definition of revenue from exchange transactions.

#### Description

Amount disclosed under service charges	5 340 265
Reclassified to surcharges and taxes	(5 340 265)
	<b>-</b>

### 42. Financial risk management

#### Financial risk management

The municipality's activities expose it to a variety of financial risks: liquidity risk, credit risk and interest rate risk.

The municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the municipality's financial performance. The municipality uses derivative financial instruments to hedge certain risk exposures. Risk management is carried out by a central treasury department (entity treasury) under policies approved by the . Municipality treasury identifies, evaluates and hedges financial risks in close co-operation with the municipality's operating units. The provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

#### Liquidity risk

Liquidity risk is the risk that the municipality will not be able to meet its obligations as they fall due. The municipality's approach is to ensure that sufficient liquidity is available to meet its liabilities when due. The municipality uses cash flow forecasts to ensure that sufficient cash is available to meet expected operating expenses. This is guided by working capital and revenue enhancement policy.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The table below analyses the municipality's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

	Up to one year	1 - 5 years	> 5 years	Total
Financial liabilities	198 087 004	417 763 435	120 373 566	736 224 005
Payables from exchange transactions	423 934 014	-	-	423 934 014
	<b>622 021 018</b>	<b>417 763 435</b>	<b>120 373 566</b>	<b>1 160 158 019</b>

#### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents, derivative financial instruments and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2018	2017
Investments	415 000 000	645 000 000
Cash and Cash Equivalents	45 422 240	124 745 373
Long term receivables	-	48 103
Consumer debtors	395 109 992	350 981 207
Receivables from non exchange transactions	94 994 986	126 481 038

#### Market risk

# City of uMhlathuze

## Notes to the Annual Financial Statements for the year ended 30 June 2018

	2018 R	2017 R
<b>42. Financial risk management (continued)</b>		
<b>Interest rate risk</b>		
As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.		
The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk. Municipality policy is to maintain its borrowings in fixed rate instruments.		
<b>43. Events after the reporting date</b>

## Notes to the Annual Financial Statements for the year ended 30 June 2018

	2018 R	2017 R
<b>46. Budget differences (continued)</b>		
<b>Explanation of variances greater than 20% between final budget and actual amounts</b>		
<b>Statement of Financial Performance</b>		
<b>Revenue</b>		
<b>Other Income:</b> The variance is the result of mainly a decreased in revenue received on extension fees for engineering contribution .		
<b>Interest Received- Investment:</b> The variance is the result of increased in surplus funds available for investments during the year mainly due to delayed capital expenditure.		
<b>Interest Earned - Outstanding debtors:</b> The variance is due to interest levied on outstanding study loan fees.		
<b>Expenditure</b>		
<b>Contracted Services:</b> The variance is mainly due to reduced expenditure on sewerate and waste disposal		
<b>General Expenses:</b> The variance is due to reduced expenditure on material and supply, legal fees and uniforms		
<b>47. Surcharges and Taxes</b>		
Water surcharges	4 492 333	5 340 265
<b>48. Contractual Liabilities</b>		
Guarantee by uMhlathuze Municipality in respect of Postal Services is R 200 000.		
<b>49. VAT payable</b>		
VAT	10 601 503	-
<b>50. Operating lease</b>		
The municipality as a lessee		
At the reporting date, the municipality has an outstanding commitments under operating leases which fall due as follows:		
<b>IT equipment</b>	<b>2018</b>	<b>2017</b>
Within one year	2 306 547	1 331 618
In the second to the fifth year inclusive	7 026 041	2 219 363
	<b>9 332 588</b>	<b>3 550 981</b>
Operating lease payment represents rentals payments by the municipality for certain of its offices. The municipality also has current lease arrangements for three years for printers. No contingent rent is payable.

### 51. Transfer of functions between entities not under common control

#### Transfer of function 1

On the municipality took over 3 wards from former Ntambanana municipality due to the de-establishment of Ntambanana municipality as a result of re - determination of boundaries in terms of Section 21 of the Local Government: Municipal Demarcation Act , 1998 ( ACT NO 27 of 1998) and Provincial notice 15 of 2016. The amount representing cash and cash equivalents due to uMhlathuze Municipality has not been received as yet and is currently disclosed under other receivables in the statement of financial position. The bank account where funds of the former Ntambanana Municipality are held is with ABSA bank and the account number is 4054154293. The balance on the bank account as at 30 June 2017 is R13 227 013.24.

The municipality used transitional provisions as per Directive 3 to report provisional amounts for assets and liabilities acquired through this transfer.

#### The amounts recognised as of the acquisition date for each major class of assets acquired and liabilities assumed

Property , plant and equipment	-	33 725 357
Intangible assets	-	97 488
Vat receivable	-	686 489
Receivables from exchange transactions	-	1 693 788
Cash and cash equivalents	-	5 639 797
Unspent conditional grants and receipts	-	(968 082)
Provisions	-	(8 226)
Payables from exchange transactions	-	(1 399 483)
<b>Total identifiable net assets</b>	<b>-</b>	<b>39 467 128</b>

### 52. Change in estimate

#### Property, plant and equipment

The municipality in the current financial year changed the estimated useful lives of certain property, plant and equipment, intangible assets and investment properties that were reaching their initial estimated useful lives. The effect of this revision has reduced the depreciation charges for the current and future periods by R4 436 639.74.

### 53. Water Losses

#### Water losses for uMhlathuze Municipality calculated at a variable cost per KL

Total produced and purchased ( KL ) amounts to:	35 765 914	32 596 276
Total sold ( KL )	24 103 435	24 094 620
Water loss ( KL )	7 662 480	8 501 656
% Loss	21	26
Variable Cost ( KL )	5	4
<b>Loss in rand value</b>	<b>39 615 013</b>	<b>34 006 624</b>

Water Losses are attributed to the following reasons:

Non-technical reasons: Included in these losses is measured water through bulk meters supplying the Traditional Areas of Mkhwanazi South, North and Dube. However individuals are not metered yet hence not billed and therefore recorded as lost at this stage.

Technical reasons: Aged reticulation without sufficient replacement, refurbishment and maintenance.

#### 54. Electricity Losses

##### Electricity losses for uMhlathuze Municipality calculated at a unit cost per kilowatt

Total Purchases ( KW )	1 053 954 829	1 155 330 744
Total Sold ( KW )	990 116 354	1 068 081 471
Electricity loss ( KW )	63 838 475	87 249 273
% Loss	6	8
Unit Cost / KW	1.25	1.06
<b>Loss in rand value</b>	<b>79 798 093</b>	<b>81 141 823</b>

Electricity losses are attributable to the following reasons:

Non-technical reasons : Theft, unmetered supply and error in metering.

Technical reasons : Electrical resistivity in the network. Ageing of network without sufficient replacement, refurbishment and maintenance. Incorrect meter calibration and monitoring.
